

Cyber Shield AI

Smart AI Protection
Against Cyber
Threats

Presented by **Kavya Geethi**

The Growing Cyber Threat Crisis

Cybercrime is accelerating — and everyday users are the most vulnerable targets. Existing solutions are complex, expensive, and inaccessible to the people who need them most.

Fraud & Scam Calls

Fake calls and voice phishing attacks are rising sharply, targeting users across all demographics.

Phishing & OTP Scams

Deceptive messages and fake OTP requests steal credentials and drain bank accounts daily.

Awareness Gap

Most users lack the knowledge to identify threats — and affordable, simple tools are virtually nonexistent.

Introducing Cyber Shield AI

A unified platform that **educates, detects, and guides** users through the cyber threat landscape — in plain language, at an affordable price.

Threat Library

Searchable database of common cyber threats with prevention tips.

AI Chatbot

Instant, personalized guidance on suspicious messages or calls.

Affordable Access

Free basic tier with low-cost premium features for everyone.

What Makes Us Different

Most security tools only **detect** threats. Cyber Shield AI goes further — helping users **understand** them.

Education First

Users learn to recognize threats, building long-term digital resilience.

Guided Assistance

Step-by-step guidance when users encounter suspicious activity.

AI-Powered Detection

Smart analysis of messages, calls, and behavior in real time.

Built for Everyone

Designed for non-technical users — students, seniors, and small businesses.

Core Features

Threat Library

A curated, searchable collection of the most common cyber threats — from fake calls to OTP scams. Each entry includes clear explanations and actionable prevention tips.

- Fake call & voice phishing examples
- Phishing message templates to watch for
- OTP & SIM swap scam breakdowns
- Prevention checklists for each threat type

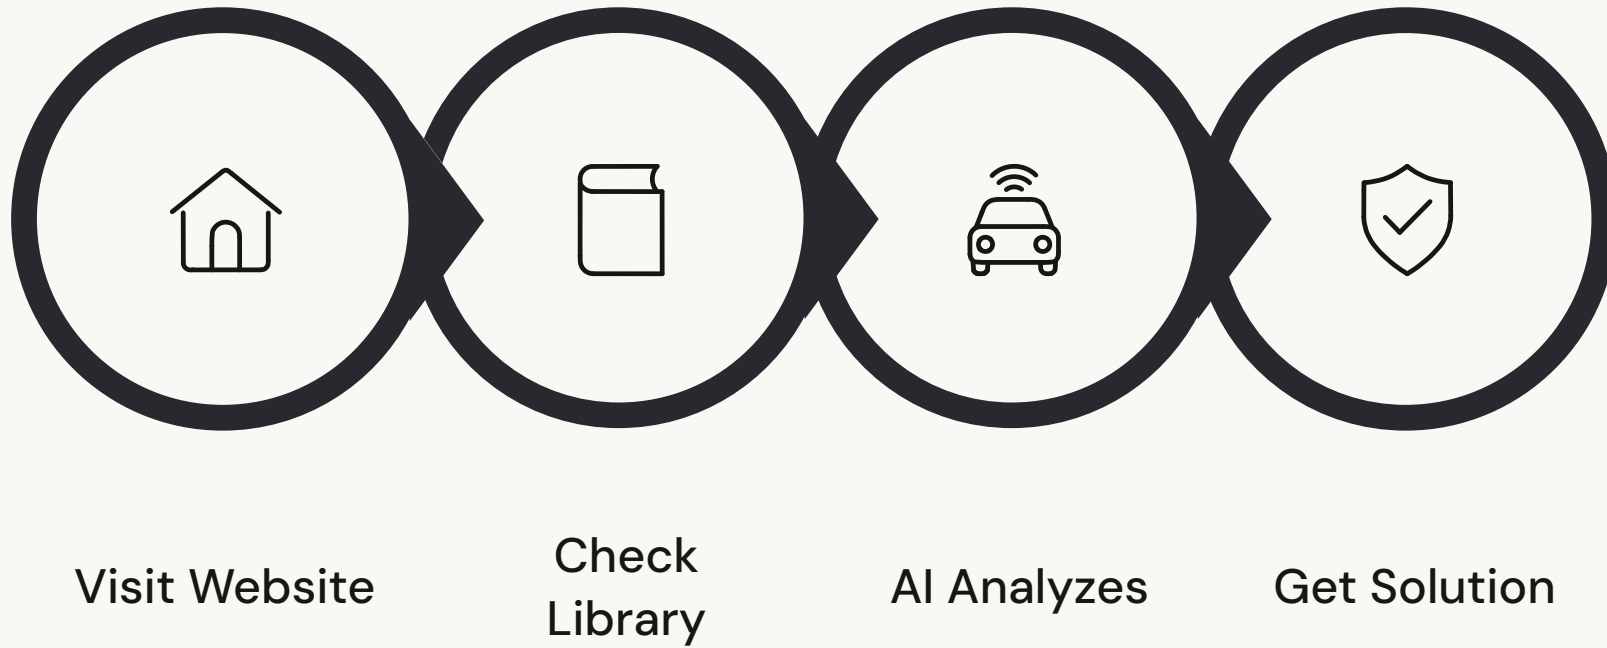

AI Chatbot Assistant

Users can ask natural-language questions and receive instant, personalized security guidance.

- "Is this message a scam?"
- "What do I do if I got a fraud call?"
- "How do I protect my bank account?"

 The AI analyzes context and provides clear, actionable responses — no technical jargon.

How It Works

Cyber Shield AI is designed for simplicity. From first visit to resolved concern, users get clear answers in seconds — no technical expertise required.

Who We Serve

Students

Digital natives who need awareness of evolving online threats.

Elderly Users

Highly vulnerable to scams — need simple, clear guidance.

Smartphone Users

Everyday mobile users exposed to phishing, fake apps, and fraud.

Small Businesses

Often lack dedicated IT security — need affordable, easy protection.

Business Model & Competitive Edge

Freemium Model

Cyber Shield AI uses a **free-to-access model** with premium upgrades, ensuring security is never gated behind a high price.

Why We Win

- **Education + AI** — No competitor combines learning with real-time assistance.
- **Built for non-tech users** — Simple UI, plain language, zero learning curve.
- **Affordable by design** — Security should not be a luxury.

Free Tier

Threat library access + basic chatbot queries

Premium

Advanced AI analysis, priority support, personalized alerts

Website & Product Roadmap

Current Platform

- Homepage with live security alerts
- Searchable Threat Library section
- Integrated AI Chatbot support
- Clean, intuitive navigation

✅ **Frontend is complete.** Backend integration and AI chatbot refinement are actively in progress.

What's Next

Phase 1 — Now

Backend
integration & AI
chatbot
improvement

1

Phase 3 — Future

Telecom
integration &
advanced AI threat
prediction

2

Phase 2 — Near-Term

Real-time call
detection & mobile
app launch

3

Cybersecurity Made Simple for Everyone

Cyber Shield AI bridges the gap between complex threats and everyday users — **educating, protecting, and empowering** people at every level of digital literacy.

Educates

Builds lasting awareness through the Threat Library

Protects

AI-powered detection and instant guidance

Accessible

Affordable for students, seniors, and small businesses

Thank you for your time. Questions? Let's discuss how Cyber Shield AI can secure the digital world — one user at a time.
